CHIMANKAR AMARDIP

Contact: 070-8939-0201(M)　**DOB:** 1983/02/01(42 Years Old)
Nationality: Indian
Language: English、Japanese, hindi
Visa Status: Engineer Visa(2029)
JLPT: N3 Level Passed,N2 Appeared

■Summary

- Over 13 Years of Experience as a Software Developer.
- Worked on multiple domain development projects for Smartphone Application, Windows Application & Web Application development.
- Experience in Development lifecycle from requirement understanding, database designing, coding, and testing.
- Strong domain knowledge in Finance, E-commerce & Automation

■Certifications

- Certified JLPT N3
- Udemy Ultimate AWS Certified Developer Associate (2024)

■Technical Skills

Operating Systems	Mac OS ,Windows 7,10,11, Basic Linux(Ubuntu) ,UNIX
Languages	PHP, JAVA ,Java Servlet, JSP , Python, C, C#.NET,VB.NET ,XAML ,C++,XML
DBMS	MS SQL Server , MySQL, Postgresql,Oracle
Third Party SDK	Vuforia AR, Silverlight, Telerik Rad Control
Dev Tools	Eclipse, Android Studio,Visual Studio
Mobile	Android
Web technologies	HTML/CSS,Javascript,ASP.NET,PHP,CakePHP,Codegniter,WordPress Platform,Vue.js,Node.js,React.js
Web Server	IIS , Apache
Cloud	Azure Cloud, AWS Cloud
Other	JIRA,Confluence,GitHub,Bitbucket,Redmine,Teams,MicrosoftOffice,Hardware & Networking

■Education

Course	University	Year of Passing	Percentage
Diploma in Electronics & Telecommunication	MSBTE, Mumbai Board	2006	60.96%
B.E. in Electronics & Telecommunication	Nagpur University	2009	64.91%

■ Work Experience

1. WeStyle, Tokyo,Japan（2025年07月～ 2025年12月）

Duration	Project Name	Role Details	Technologies Used	No of Member
July - 2025 to Dec - 2025	EdgeAI Event Processing & Notification System Description – Developed a real-time EdgeAI event processing system to reduce on-site labor. ・Built FastAPI-based WebAPI for real-time EdgeAI telemetry processing ・Integrated AI Mini to generate automatic event summaries ・Retrieved and stored event data in MongoDB ・Implemented FCM push notifications for smartphones and smart glasses ・Added KPI logging for event actions, sizes, and user interactions ・Developed periodic and daily AI-based insight generation Optimized end-to-end pipeline for low-latency stadium monitoring	Programmer / Backend Engineer >Coding >Testing >REST API Development	OS:Windows11 Platform: VS Code Language:python 12 Framework:FAST API DB: MongoDB	25 member

2. Be-Next Technologies（June 2019 / Oct 2024）

Duration	Project Name	Role Details	Technologies Used	No of Member
0ct - 2022 to Oct - 2024	PARFA Project Description – Prototype Application of Rearrangement to facilitate Analysis(PARFA) Internal web application for visualizing data, automating reports, and enhancing interactive analysis ・File Upload Support for Excel and Image files ・Excel File Parsing and Data Extraction ・Dynamic Network Diagram with Node & Edge Manipulation ・Multi-node Selection and Dragging ・Force-Directed Auto Layout (Repulsion/Attraction Logic) ・Interactive Table and Graph Creation (Bar, Pie, Line) ・Dashboard View Combining Graph + Table + Network ・Exporting ZIP (Image + Excel) ・Flask REST API Integration for	Programmer: >Coding >Testing >UI Development >REST API Development	OS: Windows 10 Platform: VSCode Language:Python9,Django,HTML5,CSS3, Javascript(ECMA) React.JS DB:SQLITE Google Teams	5 Members

	Processing Modules ・Django ORM for Database (SQLite) ・Unit Tests using pytest ・Postman for API Validation Client: Hitachi, Japan			
March - 2022 to Sep - 2022	ORACLE BRM API OPERATION Description – Worked on Oracle BRM (Billing and Revenue Management) system focusing on API testing, data validation, and system analysis. Involved in backend data verification, API behavior analysis, and documentation creation to ensure data consistency and system reliability. ・Performed API testing using SOAPUI ・Conducted unit testing and integration testing ・Analyzed BRM billing data and verified data accuracy in Oracle database ・Validated API and database mapping ・Executed SQL queries for data extraction and verification ・Identified data inconsistencies and supported issue resolution ・Created Test Specification Documents ・Prepared Functional Design Documents ・Created Table Definition and Database Documentation Client: iDEA, Japan	Programmer: >Coding >Testing	OS: Windows 10 Platform: VSCode API Test Tool : SOAPUI Language:Python8 DB:Oracle Server : DASS	25 Members
July -2021 to Feb - 2022	Electricity Application Development Description - Developed and maintained a serverless backend application using AWS cloud services. Responsible for API development, cloud infrastructure management, and database integration within a microservices-based architecture. ・Designed and implemented RESTful APIs using AWS Lambda (Python) ・Built serverless architecture integrated with API Gateway ・Implemented data processing and integration with PostgreSQL (AWS RDS) ・Managed logging and monitoring using AWS CloudWatch ・Designed IAM roles and managed access permissions following security best practices ・Provisioned and managed AWS infrastructure using Infrastructure as Code (IaC) tools such as CloudFormation and Terraform	Programmer: >Coding >Testing	OS: Windows 10 Platform: VSCode Language:Python8 and 9 DB:PostgreSql Cloud : Aws Cloud	5 Members

	・Performed unit testing using pytest and conducted integration testing ・Prepared technical design documents and test specification documents Client: BFT, Japan			
April - 2021 to June - 2021	Solar Inverter IOT development Description:Basically,this development took data (power, voltage, current) from Solar Inverter and sent the data to the cloud screen page. Client: Century Yarks, Japan	Programmer: >Coding >Testing	OS: Linux Debian 9 Platform: VSCode Design: Html,CSS,Javascript Language:Embedded C DB:PostgreSql Protocol : Modbus PCS : Enewell SOL 2 Web Server: NodeJs Protocol :Modbus	3 Members
July - 2020 to Mar - 2021	Development of parking lot reservation system Details: This is an IOT development app for parking reservations that sends and receives messages between AZURE CLOUD and ARMADILLO GATEWAY. Client: Hitex, Japan	Programmer: >Designing >Coding >Testing	OS:Mac air 10 Platform : Netbeans 11 Armadillo Gateway Design: Vue.js Language: Java Service : Microsoft Azure DB: Sql Server Web Server:NodeJs	5 Members
June -2017 to Feb - 2018	Order Management system development Details: This is a project to fix the internal management system. that modify the data from table, view, store procedure of sql server database and then test to see if the data is correct. Client: Softbank, Japan	Programmer: >Designing >Coding >Testing	OS:Windows 10 Platform:Eclipse Design: JSP, XML Language:Java Servlet, JSP DB:SQl Server WebServer:Apache Tomcat	25 Members

July - 2019 to Aug - 2019	Development of mobile camera app Details: This is an IOT app. It is an application that uses the Garmin sensor like Heartbeat sensor and bike sensor, you can connect the camera and bluetooth and you can see the person's Heartbeat and BikeSpeed on the overlay screen of the camera. Client: PCI Solution, Japan	Programmer: >Designing >Coding >Testing	OS:Window 10 Platform:Android Studio Design:xaml Bootstrap,javascript Language:Java DB: MySql Web Server:Apache	6 member

2. Infoz Software Solution（July 2016 / May 2019）

Duration	Project Name	Role Details	Technologies Used	No of Member
Dec- 2018 to April - 2019	WaySahara - Taxi Booking App Description: This is a Taxi Booking App which is very much similar to Ola and Uber App.We have built this app using Native Java for Android using Android Studio . Client - Waysahara	Programmer: >Designing >Coding >Testing	OS:Mac air 10 Platform:Android Studio Design: Core Java,XML Language:PHP 7.0.32 Framework - Codeigniter DB:MYSQL 5.7 Web Server:Apache 2.4.34	7 Members
Feb - 2018 to Nov - 2018	Agriculture IOT Project Description: basically This is Automation Agriculture project where we used sensors and hardware To sense the levels of water,soil etc using Internet of Thing Client - Infoz Solution	Programmer: >Designing >Coding >Testing	OS:Mac air 10 Platform:Android Studio PLC program Hardware - Mode Bus Design: Core Java,XML Language:PHP 5.6 Framework - Yii2 DB:MYSQL 5.7 Web Server:Apache 2.4	5 Members
June -2017 to Feb - 2018	Tvarak – Sales Accelerator Description: Tvarak is most affordable and efficient with an all in one sales process accelerator which will help corporations to monitor entire business on real time from anywhere anytime. Website - http://tvarak.com/ Play Store - https://bit.ly/2vvXSGM	Programmer: >Designing >Coding >Testing	OS:Mac air 10 Platform:Android Studio Design: Core Java,XML Language:PHP 5.6 Framework - Yii2 DB:MYSQL 5.7	5 Members

	Client: Infoz Solution		Web Server:Apache 2.4	
Jan -2017 to May- 2017	Metrika CRM Description: The basic idea of this application is manufacturing CRM. This will help you to manage entire manufacturing steps within a quick time. Client: Infoz Solution	Programmer: >Designing >Coding >Testing	OS:Window 10 Platform:WAMP Design:HTML5,CSS3, Bootstrap,javascript Language:PHP 5.6 Framework- Yii1 DB:MYSQL 5.7 Web Server:Apache 2.4	6 member
July-2016 to Dec 2016	Daily English(Speakwell) Description: This is mobile application, basically this is an Educational CRM project , in which you can learn daily English. Play store - shorturl.at/oqtxE Client: Speakwell	Programmer: >Designing >Coding >Testing	OS:Window 10 Platform:Android Studio Design: Core Java,XML Language:PHP 5.6 DB:MYSQL 5.7 Web Server:Apache 2.4	5 Members

3. **Atlink Corporation Japan（June 2015 / April 2016）**

Duration	Project Name	Role Details	Technologies Used	No of Member
June-2015 to-April -2016	**Ryokin System :** **Description:** Ryokin system is a sales management team software development project. It shows sales reports in the dashboard & displays sales achievements & progress data with graphical representation. **Client**: AtLink Corporation	Programmer: >Designing >Coding >Testing	OS:Window 7, Platform:PHP 5.3 Design: HTML5,CSS3,Bootstrap, javascript Language:PHP DB:MYSQL 5.5 Web Server:Apache 2.2	10 Member

4 **Shinten Systems Private Limited（Aug 2011 / May 2015）**

Jan-2015 to May 2015	Restaurant Management Systems : Description: Restaurant Management Systems is Restaurant Financial Management team software development project It shows reports monthly and weekly and generate report as pdf form and send email automatically. Client : Amrapali Restaurent & Tandoor, Japan	Programmer: >Designing >Coding >Testing >Configuration	OS:Window 7, Platform:PHP 5.3 Design: HTML5,CSS3,Bootstrap,javascript Language:PHP DB:MYSQL 5.5 Web Server:Apache 2.2	4 Member
Nov-2014 to Jan-2015	Amrapali Restaurant Website : Description: Development of website for Indian Restaurant in Japan. Client:Amrapali Restaurent & Tandoor, Japan URL: http://amrapalijapan.com/	Web Developer: >Designing >Coding >Testing >Configuration	OS:Window 7, Platform:PHP 5.3 Design: HTML5,CSS3,Bootstrap,javascript Language:PHP DB:MYSQL 5.5 Web Server:Apache 2.2	3 Member
July-2014 to Nov-2014	Safety Specialities : Description: Development of website for safety solutions, consultancy, services supply & Fire Safety Equipments. Client : Safety Specialties, India URL: http://www.safeindus.com	Programmer: >Requirement Understanding >Designing >Coding >Testing	OS:Window7, Platform:Wordpress4.4 Design: HTML,CSS Language:PHP5.3 DB:MYSQL 5.5 Web Server:Apache2.2	2 Members
June-2013 to June-2014	ShinAR + Description: This is free android app based on Augmented Reality (AR) Feature for e-commerce. - View 3D virtual product - Move 3D object in 360 Degree - AR experience on Marker - Client: Shinten Systems	Programmer: >Requirement Understanding >Designing >Coding >Testing	OS:Window7, Platform: Android 4.4 Dev Tool: Android Studio Language: Java Third Party SDK: Vuforia	3 Members
Feb-2013 to May-2013	Nobel Prize Petition Description: Nobel Prize Petition software development project to Creating Petition for to give Nobel Prize to Dr. B. R. Ambedkar. Client :AIM,Japan URL: http://www.aimjapan.org/	Programmer: >Requirement Understanding >Designing >Coding >Testing	OS:Window 7 Platform:PHP 5.3 Design: HTML5,CSS3,Bootstrap,javascript Language:PHP DB:MYSQL 5.5 Web Server:Apache 2.2	3 Members
Oct-2012 to Feb-2013	City Office Reporting Tool: Description: Windows Application Development project which issues address and family certificate as an excel report in Nagpur city office. Client: Nagpur Development Trust	Programmer: >Requirement Understanding >Designing >Coding >Testing	OS:Window7, Language:VB.NET DB:SQL Server 2008 3rd Party: Telerik Rad Controls	5 Members

Nov-2011 to Sep-2012	ANIMAL 3D CG: Description: To show Animal 3D images on web sites. Viewers can rotate Image at 360 deg. & can see any part closely by using zoom in, zoom out functionality Client: AtLink Corporation	Programmer: >Requirement Understanding >Designing >Coding >Testing	OS:Window7, Design: XAML, Silverlight 4.0 Language:ASP.NET DB:SQL Server 2008 Web Server: IIS 3rd Party: Telerik Rad Controls	5 Members

■ Professional Summary

Technical Expertise

I am a Full Stack Engineer with over 13 years of development experience across diverse domains including Web applications, Mobile applications, IoT systems, and enterprise business systems. I have been involved in the complete software development lifecycle, from requirement analysis and system design to implementation, testing, deployment, and maintenance.

My core technical strengths include backend and frontend development using Java, Python, PHP, and JavaScript (React / Vue), as well as cloud-based development using AWS and Azure. I have hands-on experience in building scalable APIs, microservices, serverless architectures, and database-driven applications.

Strengths & Work Approach

I have more than 6 years of professional working experience in Japan and hold JLPT N3 certification. In addition to technical expertise, I am confident in team coordination, task management, and problem-solving abilities.

I am proactive in learning new technologies and continuously improving my skills. Throughout my career, I have been recognized for my strong ownership, adaptability, and ability to work effectively in multicultural and client-facing environments.

I would sincerely appreciate the opportunity to further discuss how I can contribute to your organization.
